斑麗翅蜻

體型相當大而極具吸引力的斑麗翅蜻常被人誤當為蝴蝶。牠的全彩翅膀有著琥珀色及深褐色斑紋交雜而成的獨特圖案使人容易辨認。牠是一種捕食性昆蟲。常見於池塘及沼澤地區。

Variegated Flutterer

A fairly large and extremely attractive Variegated Flutterer is often mistaken as a butterfly. It can be recognized by the fully coloured wings with their distinctive amber and dark brown variegated pattern. It is a predatory insect. It is usually found in ponds and marsh areas.
